

## Acne Awareness

Half price  
offer  
only £30

**David, 27, from Billinge** suffered terribly until he was treated with the **N-Lite** laser. "I had grade 7 acne which meant that washing my face was painful and anything more than a light wipe with a facecloth would incur bleeding every morning. Shaving was almost impossible, and would mean that razor rash occurred no matter how much I prepared my skin beforehand. I had tried many antibiotics and was very concerned at the side effects of the only other alternative **Roaccutane** treatment, so decided to go ahead with laser treatment.

The **N-Lite** treatment at Laserase Bolton feels like a light pin prick sensation as the laser pulses at slightly slower than every second intervals. Some areas are more sensitive than others and the pulses become slightly more uncomfortable but the discomfort lasts only the duration of the laser pulse. I visit Laserase Bolton once a year for a top up and am still experiencing the benefits."

### Do you also suffer with acne?

Would you like an in-depth analysis of your skin, using the latest technology, to help you understand it's true condition?

You're in the right place! We have appointments available for **dermavision** Digital Facial Skin Analysis

We can help you make sense of the puzzle with advice on the correct skin care products to use and whether laser, IPL or peels may be suitable for you.

A one hour in-depth consultation with one of our nurses for only £60
